Professional Summary

Software Engineer with 3+ years of experience developing backend applications, REST APIs, automation workflows, and cloud-native systems using Python, Django, Laravel, JavaScript, AWS, Docker, and Kubernetes. Pursuing a Master of Engineering in Electrical and Computer Engineering at the University of Calgary. Experienced in system integration, CI/CD automation, Linux environments, troubleshooting, distributed systems, machine learning, and Generative AI. Strong interest in building scalable systems in Cloud and AI.

Technical Skills

Languages: Python, JavaScript, PHP, SQL, Bash, Java

Frameworks: Django, FastAPI, Laravel, React, LangChain, LangGraph

Cloud & DevOps: AWS (EC2, S3, IAM, Lambda), Docker, Kubernetes, GitLab CI/CD, ArgoCD, Git, Linux

Databases & Messaging: PostgreSQL, MySQL, RabbitMQ

Networking & Systems: TCP/IP, REST APIs, Distributed Systems, System Monitoring, Troubleshooting

AI & Data: Machine Learning, Neural Networks, Random Forest, Gradient Boosting, Generative AI, RAG

Professional Experience

Soft BD

Sep 2022 – Aug 2023

Assistant Software Engineer

- Developed a government job platform NISE (<https://nise.gov.bd/>) serving 5M+ users using React, Laravel Lumen, and MySQL.
- Built REST APIs with JWT authentication and OpenAPI documentation for secure integration.
- Automated identity verification workflows using backend services, improving efficiency by 60%.
- Managed CI/CD pipelines using GitLab, ArgoCD, Docker, and Kubernetes, reducing deployment time by 40%.
- Supported production systems, troubleshooting issues and improving system reliability in Linux environments.

App Atlantis Corporation

Mar 2022 – Sep 2022

Software Developer

- Developed an eCommerce platform Krishibazar (<https://krishibazar.com.bd/>) using Django, PostgreSQL, and JavaScript with 10K+ active users.
- Integrated payment gateway supporting 1,000+ monthly transactions.
- Built backend services and supported production troubleshooting and deployment activities.

Excel IT AI

Apr 2021 – Feb 2022

Junior Software Engineer

- Led a 5-member team to develop a CRM system using Laravel, improving workflow efficiency by 35%.
- Built dashboards and POS features and collaborated with stakeholders for requirement delivery.

Certifications

- AWS Certified Cloud Practitioner
- Microsoft Certified: Azure Fundamentals (AZ-900)

Projects

Security-Constrained Economic Dispatch Tool

<https://github.com/Nabil-Ahmed-Sheikh/Power-system-forecasting-tool>

- Built a Python + Gurobi optimization system for power system operational planning and decision support.
- Developed ML models (Random Forest, Gradient Boosting, Neural Networks) achieving 85%+ accuracy.
- Applied forecasting, automation, and analytics for real-time system performance evaluation.

AI-Powered Interview Prep Platform

<https://github.com/Muntasirornob/AI-Powered-Interview-Prep>

- Built a Generative AI platform for resume analysis, job tracking, and cover letter generation.
- Implemented RAG-based backend APIs using LangChain and document processing pipelines.

Education

University of Calgary

Calgary, AB

Master of Engineering, Electrical and Computer Engineering
